Bachelor's Degree in

DATA ANALYSIS

→  **Scientific coordinator**
Prof. Giacomo Fiumara
gfiumara@unime.it

 **Department**
Mathematic's and Computer Science,
Physics and Earth Science

 **Duration**
3 years

Bachelor's degree in
DATA ANALYSIS

→ Programme overview

Huge volumes of heterogeneous data are continuously being generated by people and computer systems in the rapidly evolving modern world. This data, commonly referred to as "Big Data", needs to be properly processed. The Bachelor's Degree in Data Analysis will produce data scientists whose solid technical background is complemented by a multidisciplinary preparation in various fields where Big Data is present. Data scientists are in high demand by Industry 4.0, consulting companies and public institutions. Data scientists are needed to design and implement computer systems able to store, manage and analyse Big Data, as well as provide managers and stakeholders with a clear report of their results so that they can make critical decisions. Furthermore, this degree entitles graduates to participate in engineering licensing exams to work as engineers.

Skills acquired in this programme include:

- design and development of complex and innovative Cloud/Edge/Fog computing and Internet of Things (IoT) systems able to store and manage Big Data;
- experimental design and development of complex Big Data analytics algorithms based on the most recent Artificial Intelligence (AI) techniques including Machine Learning and Deep Learning;
- capacity of adaption to any inter-disciplinary working environment that requires data Analysis expertise.

→ Minimal entry requirements

An Italian secondary school diploma or a certified foreign equivalent demonstrating 12 years of study is required.
Scan the QR Code for further admission requirements criteria.

→ Language requirements

International English language certificate issued by an Institution recognized by the Italian Ministry of University and Research (MUR), B2 level of the Common European Framework of Reference.

→ Study programme

The Bachelor's Degree in Data Analysis belongs to the classification of the Computer Science degree (L-31).

DATA ANALYSIS

YEAR 1

- Calculus
- Discrete mathematics
- Mathematics for data analysis
- Physics
- Programming
- Object-oriented programming
- Algorithms and data structures

DATA ANALYSIS

YEAR 2

- Computer architecture
- Computer networks
- Operative systems
- Database
- Software engineering
- Cloud computing
- System security
- Statistical methods and models

DATA ANALYSIS

YEAR 3

- Web programming
- Data mining & analytics
- Machine learning
- Technology and Innovation
- Wireless sensor networks
- Enterprise internship
- Thesis

Bachelor's degree in
DATA ANALYSIS

→ International opportunities

UniME students have the opportunity to participate in the Erasmus+ Mobility programme both for study and training. Calls are published on the site twice per year.

Another opportunity for students is the UniME Funded programme "Students Around the World" (SAW) call for scholarships for study at the extra-European universities in the context of international cooperation agreements. For further information please visit our site.

→ Tuition fees

UniME tuition fees for international students are calculated by country group. For further information:

"This degree programme is preparing me for an important career in Big Data management. I am really excited about my courses. I will be learning about Artificial Intelligence, like Machine Learning and Deep Learning. I am really looking forward to learning and developing my skills in the Data Analysis area. My teachers are excellent and they really challenge us to do our best."
