Programme overview
This programme provides students with the knowledge and skills appropriate to careers in the banking, financial and corporate sectors. Graduates can work as financial investors, stock brokers, commercial banking and corporate finance.

The Vocational Master in Banking and Finance will enable students to acquire the knowledge necessary to professionally manage and advise on assets of any amount. The course is aimed at both professionals in the financial sector and graduates without experience wanting to work in:
banking and financial markets;
asset portfolio management;
investment consultation.

After completing the course, students have the possibility to enter the second year of the Master’s degree programme in Economics & Finance.

Minimal entry requirements
Students should hold at least a three-year undergraduate degree in any subject.

Language requirements
International English language certificate issued by an Institution recognized by the Italian Ministry of University and Research (MUR), B1 level of the Common European Framework of Reference.

Department
Economics

Duration
1 year
Study programme
The Master in Food, Quality and International Management is a practical and dynamic program that offers 60 ECS. The programme is divided into 6 key areas (January-July)
1. Economics Section (6 ECTS)
2. Management Section (10 ECTS)
3. Marketing Section (10 ECTS)
4. Sustainability Section (4 ECTS)
5. Digital Section (6 ECTS)
6. Quality & Safety Section (12 ECTS)

At the end of each module, students will participate in a written examination. Second term students (August-December) will prepare their final dissertation under the supervision of an academic staff member. In addition, they will be required to do an internship either in a public or public company that supports the Master. The Master is officially sponsored by high-profile national and transnational companies that provide students with traineeship opportunities worldwide.

International opportunities
This one year master degree course consolidates knowledge in Quality and International Management in the Food Supply Chain, combining economics, strategical planning and digital skills. Students acquire a strong background in category management, ISO standards for quality and traceability, and marketing management within an international environment, which enables them to work as professionals in various food areas in the private and public sectors.

After receiving the Food, Quality and International Management qualification, students may complete their knowledge with the Master’s Degree programme in International Management.
